Once your teams have been established, go to <https://bingosync.com> and one person in your game creates a room to make a board. Make sure that the room name and password is easily recognisable and memorable. For the game field, set this to "Custom (Advanced)" and set the Variant to "Randomised" For the board, copy the text outlined in the "Objectives" tab in this document and paste it into the board field. Lastly, check the box that states "Hide Card Initially" Double Check that this follows the example below, and once you're done the room is created. Anyone can join this if they have the proper password. Make sure that everyone on your team is the same colour.

The card will be hidden until 10:29am where you'll have 1 minute to route and strategise until the game begins. Whoever is able to obtain a full line first will be declared winners. The board is a lockout board so once a team has completed a task, the other team will not be able to claim it. In the event that no team completes a full line. The victory will be awarded to whatever team has the most squares at the end of the game day.

Powerups:

Powerups are a great way to level up and get ahead of the opposing team. You can obtain powerups by getting certain shapes which allow you progress.

- Square, 4 tiles in a square shape allow you to freeze the opposing team for 30 minutes
- Plus, Tiles arranged in a plus shape allow you to add any objective of your choosing that has not been ticked off.

Be aware that powerups can stack, so make sure to play defensive to prevent these from happening!
